با کلمات بهم ریخته جمله بسازید.

- 2 26-future/needs/plan/everyone/for/to/the/  
27-the/lions/dangerous/the world/animals/are/most/in

فرم صحیح کلمات داخل پرانتز را بنویسید.

- 2 28-Mercury is ..... planet in the solar system. (hot)  
29-The ..... are playing in the yard. (child)  
30-His handwriting was ..... than her handwriting. (bad)  
31-My father is 50 years old .my mother is 50 too.my father is ..... my mother. (old)

1 در هر جمله یک خطای گرامری وجود دارد آن را مشخص کنید و صحیح آن را بنویسید.

- 32-Mashhad is more busy than Abadan.  
33-The phone is ringing. I am going to answer it

0.5 (intonation) آهنگ جمله را مشخص کنید.

- 34-Did you go to school yesterday? a) falling b) rising  
35-How can we save wildlife? a) falling b) rising

سوال تصویری: با توجه به تصویر به سوالات زیر پاسخ دهید. (2)

- 2 36-What is he going to do?

- 37-Which one is the fastest of all?

- 2 38-در مورد یکی از شگفتی های خلقت که نظر شمارا بیشتر به خود جلب کرده است . یک پاراگراف بنویسید.

5.5 متن زیر را با دقت بخوانید و به سوالات پاسخ دهید.

The solar system is the sun and the objects that travel around it. The Earth is part of the solar system because it also travels around the sun.

The sun is a star like the other stars in the sky but it is much closer to the earth. The sun is a big ball of gases made mostly up of hydrogen and helium.

There are seven other planets that travel around the sun too. These planets in order are Mercury Venus Mars Jupiter Saturn Uranus and Neptune. Earth is between Venus and Mars. Each of the planets in the solar system takes a different amount of time to travel around the sun.

The planet Earth takes 365 days or one year to go around the sun. The other planets take more

or less time to go around the sun. It takes Mercury less than three month or 88 days to travel around the sun.

It is the shortest time compared to the other planets. The planet taking the longest time to go around the sun is Neptune. It takes Neptune 165 years to travel around the sun.

The planets of the solar system are of different sizes and are made up of different things. The largest planet in the solar system is Jupiter. Over 1000 Earth could fill the size of Jupiter. The smallest planet is Mercury is also the closest planet to the sun. Earth and Venus are similar in size to each other.

39-The sun and the objects that travel around it are called .....

- a) planets                      b) the solar system                      c) moons                      d) stars

40-What is the difference between the sun and the other stars of the universe?

- a) The sun is much farther away                      c) the sun is too small  
b) The sun is closer to the earth                      d) the sun is much larger

41-Which of the following shows the smallest and largest planets of the solar system?

- a) Mercury and Saturn                      c) Venus and Earth  
b) Mercury and Jupiter                      d) Saturn and Jupiter

### *True/False*

42-The size of planets are not the same.

T ☐                      F ☐

43-Only the Earth travels around the sun.

T ☐                      F ☐

44-What does a year mean?

45-How big is Jupiter?

46-Which planets are similar in size?

47-How long does it take Neptune travel around the sun?

*Good luck*
